company

# ABOUT THE COMPANY

The company was founded in 2012.

The head office is in the city of Porta Westfalica, Germany.

The company has branches in the Republic of Kazakhstan, Almaty, and in Russia, the city of St. Petersburg

Cooperation with factories: Buhlmann-Group, Rose Systemtechnik, Nelson, nVent, R.Stahl, EATON

Our goal is long-term cooperation, solving business problems of the Customer.

The main specialization of the company is the supply of equipment and components for the oil and gas and industrial industries.

# WE GUARANTEE

Timely fulfillment of contractual obligations.

Constant customer base growth.

Preparation of a commercial proposal as soon as possible.

Flexible system of discounts for regular customers.

Qualified personnel will always help in the selection of equipment.

Logistic services around the world.

# WARRANTY SERVICES

If we are talking about industrial use, then reliability, durability and the ability to long continuous operation are not the least among them. The uptime of the tool in modern conditions, when the pace of production and construction is very high, and one day of downtime is expensive, the most important characteristic of a power tool

Our company provides after-sales service of the tool during the entire period of its operation, which significantly reduces customer costs for repairs, production downtime due to a broken tool, loss of time searching for a service center.

# CARGO DELIVERY SERVICES

Our company cooperates with leading transport companies and has first class specialists who can find a comprehensive approach for the delivery of any cargo, which is a very important criterion in today's intensive business. We provide the minimum delivery time and favorable transportation cost. In turn, this affects the final price of the product and the timing of its delivery.
